## Authorisation

In accordance with Part 3 Division 4 of the Rural Fires Act 1997, this Plan has been prepared by the Castlereagh Bush Fire Management Committee and has been endorsed at the BFMC meeting on 27<sup>th</sup> March 2012 for submission to the Bush Fire Coordinating Committee.

### Recommended

27/03/2012

Councillor Mayor Peter Shinton

Chairperson

Castlereagh Bush Fire Management Committee

### Approved

16/1/2013

Shane Fitzsimmons, AFSM  
Chairman  
NSW Bush Fire Coordinating Committee

On behalf of the

NSW Bush Fire Coordinating Committee

## Glossary

**Assets:** anything valued by the community which includes houses, crops, heritage buildings and places, infrastructure, the environment, businesses, and forests, that may be at risk from bush fire.

**Bush Fire:** a general term used to describe fire in vegetation, includes grass fire.

**Bush Fire Hazard:** the potential severity of a bush fire, which is determined by fuel load, fuel arrangement and topography under a given climatic condition.

**Bush Fire Risk:** the chance of a bush fire igniting, spreading and causing damage to the community or the assets they value.

**Bush Fire Risk Management:** a systematic process that provides a range of treatments which contribute to the well being of communities and the environment, which suffer the adverse effects of wildfire/bush fire.

**Bush Fire Threat:** potential bush fire exposure of an asset due to the proximity and type of a hazard and the slope on which the hazard is situated.

**Consequence:** outcome or impact of a bush fire event.

**Fire Fighting Authorities:** the NSW Rural Fire Service, NSW Fire Brigades, the National Parks and Wildlife Service and Forests NSW.

**Likelihood:** the chance of a bush fire igniting and spreading.

**Major Bush Fire:** a bush fire which requires the attendance of multiple brigades, or causes damage to property or injury to one or more persons.

**Display area:** geographic area determined by the Bush Fire Management Committee which is used to provide a suitable area and scale for community participation and mapping display purposes.

**Recovery costs:** the capacity of an asset to recover from the impacts of a bush fire.

**Risk Acceptance:** an informed decision to accept the consequences and the likelihood of a particular risk.

**Risk Analysis:** a systematic process to understand the nature of and to deduce the level of risk.

**Risk Assessment:** the overall process of risk identification, risk analysis and risk evaluation.

**Risk Identification:** the process of determining what, where, when, why, and how something could happen.

**Risk Treatment:** the process of selection and implementation of measures to modify risk.

**Vulnerability:** the susceptibility of an asset to the impacts of bush fire.

## Chapter 1. Introduction

### 1.1 Background

Under the *Rural Fires Act 1997* the Bush Fire Coordinating Committee (BFCC) must constitute a Bush Fire Management Committee (BFMC) for each area in the State, which is subject to the risk of bush fires. Each BFMC is required to prepare and submit to the BFCC a Bush Fire Risk Management Plan (BFRMP).

A BFRMP is a strategic document that identifies community assets at risk and sets out a five-year program of coordinated multi-agency treatments to reduce the risk of bush fire to the assets. Treatments may include such things as hazard reduction burning, grazing, community education, fire trail maintenance and establishing community fireguard groups.

Annual programs to implement the treatments identified in this plan will be undertaken by the relevant land managers and fire fighting authorities.

In exercising its functions under the *Rural Fires Act 1997*, including the preparation of a bush fire risk management plan, the Castlereagh BFMC is required to have regard to the principles of ecologically sustainable development (ESD).

This document and the accompanying maps together form the BFRMP for the Castlereagh BFMC area.

This BFRMP has been prepared by the Castlereagh BFMC and covers both public and private lands. This BFRMP must be reviewed and updated within each successive five-year period from the constitution of the BFMC.

The BFCC recognises that climate change has the potential to increase bush fire risk. The risk assessment process applied in this BFRMP is based on current climatic conditions. The BFCC will monitor information on climate change and will modify the process when necessary.

### 1.2 Aim and Objectives

The **aim** of this BFRMP is to minimise the risk of adverse impact of bush fires on life, property and the environment.

The **objectives** of this BFRMP are to:

- reduce the number of human-induced bush fire ignitions that cause damage to life, property and the environment;
- manage fuel to reduce the rate of spread and intensity of bush fires, while minimising environmental/ecological impacts;
- reduce the community's vulnerability to bush fires by improving its preparedness; and
- effectively contain fires with a potential to cause damage to life, property and the environment.

### **1.3 Description of the Castlereagh BFMC Area**

#### **1.3.1 Location and land tenure**

The Castlereagh BFMC area is located in the Upper Central West Slopes and Plains and Lower North West Slopes and Plains of New South Wales and includes the Local Government Area of Gilgandra and Warrumbungle.

The area covered by the Castlereagh BFMC is 17,888.5 sq. km and includes the land tenures outlined in Table 1.1.

<b>Land Manager</b>	<b>% of BFMC area</b>
National Parks & Wildlife Service	9.94
Forests NSW	3.39
Department of Lands	1.89
Local Government	0.25
Private	84.03
All other	0.50

**Table 1.1 Land Tenure**

#### **1.3.2 Climate and bush fire season**

The typical / average climate in the Castlereagh BFMC area does not vary much across the BFMC area with warm to hot temperatures with winds normally from the western sector during the summer with cool to cold dryer winter period.

Summer rainfall is generally in the form of severe electrical storms caused by cold fronts moving in from the west. Dry lightning storms can also occur during dryer seasonal conditions across much of the BFMC area.

The bush fire season generally runs from October to March. Mid November to end of December is typically the worst months for large fires. In the south fire activity can continue until February – March during dryer years.

#### **1.3.3 Population and demographic information**

The population of the Castlereagh BFMC area is approximately 14,330 people. The major population centres are Coonabarabran, Coolah and Gilgandra.

The following issues have been identified within the Castlereagh BFMC area as potentially impacting on the ability of certain sections of the community to prepare themselves for bush fire:

1. Large numbers of absentee landowners in remote areas
2. Ageing population, particularly in rural areas
3. An increase in commuting workers leaving properties in pursuit of work.
4. An increase in rural residential subdivisions in fire prone areas.

### **1.3.4 History of bush fire frequency and ignition cause**

The Castlereagh BFMC area has on average 80 bush fires per year, of which 3 on average can be considered to be major fires.

The main sources of ignition in the Castlereagh BFMC area are;

1. lightning,
2. escape from legal burns,
3. farm machinery,
4. incendiaries and
5. campfires.

Lightning activity in the area is mainly associated with spring and summer electrical storms (November through to the end of March). These storms are usually accompanied by heavy rainfall, however, periodically they happen with little or no rain causing the possibility of ignition where strikes occur. Generally these storms follow ironstone outcrops, Warrumbungle Mountains, Pilliga scrub and dry sclerophyll forests within the Castlereagh area.

Most escapes from legal burns occur mainly in the rural farming and grazing managed lands spread through the whole of the Castlereagh BFMC area and rural subdivisions or rural/urban interface areas around the major towns. Farm machinery and mechanical ignitions usually happen during the summer grain harvest period from mid November to the end of January and are generally the result of poor maintenance of machinery. During the summer school holiday periods the possibility of incendiaries can increase.

## Chapter 2. Identifying and Assessing the Bush Fire Risk

### 2.1 Process

The Australia/New Zealand Standard *AS/NZS 4360: 2004 Risk Management* was used as the basis for the risk assessment process. See Figure 2.1 for the steps involved. For a detailed description of the process undertaken see the Bush Fire Risk Management Planning Guidelines for Bush Fire Management Committees on the RFS website: [www.rfs.nsw.gov.au](http://www.rfs.nsw.gov.au).

Figure 2.1 Overview of the risk assessment process

### 2.2 Communication and Consultation

Community participation is an integral part of risk management. The Community Participation Strategy involved developing and implementing a process to address the needs, issues and concerns of stakeholders within the BFMC area in regards to the BFRMP. See Appendix 1 for the Community Participation Strategy used by the Castlereagh BFMC in preparing this BFRMP.

## **2.3 Identifying the Bush Fire Risk**

Identifying the level of bush fire risk firstly involved identifying important community assets considered to be at risk from bush fire in the Castlereagh BFMC area, and then assessing the likelihood and consequence ratings.

### **2.3.1 Assets**

BFMC members and the community, including RFS volunteers, identified assets within the Castlereagh BFMC that they believed were at risk of bush fire.

The assets were divided into four asset types:

#### **Human settlement**

- Residential areas including urban bushland interface areas and rural properties;
- Special Fire Protection areas including schools, hospitals, nursing homes, and tourist facilities; and
- Other human settlement areas including commercial and industrial areas where distinct from major towns.

#### **Economic**

- Agricultural; e.g. major silos, regional saleyards, cropping/grazing land;
- Commercial/industrial e.g. major industries, waste treatment plants, sawmills;
- Infrastructure e.g. large power lines, gas and oil pipelines, railway lines, electricity substations, communication facilities;
- Tourist and recreational e.g. tourist sites and facilities, resorts, retreats;
- Mines;
- Commercial forests e.g. pine plantations, eucalypt plantations and commercial native forests; and
- Drinking water catchments.

#### **Environmental**

- Threatened species, populations and ecological communities and Ramsar wetlands;
- Locally important species and ecological communities, such as species and ecological communities especially sensitive to fire.

## **Cultural**

- Aboriginal significance – Aboriginal places and items of significance;
- Non-indigenous heritage – places and items arising from the early occupation of NSW by European or other non-indigenous settlers; and
- Other cultural assets – community halls, clubs and recreational facilities.

See Appendix 2 for the full list of assets identified in the Castlereagh BFMC area. See maps 2 - 4 for the location of assets to be treated under this BFRMP.

### **2.3.2 Assessing the Bush Fire Risk - Consequence**

Once the assets were identified, the consequence of a bush fire impacting on these assets was assessed.

See Appendix 2 for the consequence ratings assigned to each asset identified in the Castlereagh BFMC area.

The different asset types had different assessment processes used to determine the consequence. These processes are identified below.

#### **Human settlement**

A potential fire behaviour model using vegetation type, slope and separation distance was used to produce a threat rating for human settlement assets. The vulnerability of the asset to a bush fire was also assessed and a rating assigned. These ratings were then used to assess the consequence of a bush fire impacting upon a human settlement asset.

Special Fire Protection (SFP) assets were considered inherently more vulnerable to bush fire due to mobility capacity, knowledge or other issues relating to their inhabitants, (e.g. the elderly, infirm, children or tourists) and therefore stricter requirements for vulnerability assessment and rating were applied.

#### **Economic**

The level of economic impact e.g. local, regional or state, as well as the economic recovery costs (how long and complicated a financial recovery will be) of the asset were identified. These ratings were used to assess the consequence of a bush fire impacting upon an economic asset.

#### **Environmental**

Environmental assets with known minimum fire threshold were assessed to determine if they were at risk of a bush fire within the 5 year life of the BFRMP using fire history data. Those environmental assets which were within or above the fire threshold were not assessed in the BFRMP, as the negative impact of a fire within the 5 year period was determined as being low and may even be of benefit to the asset and surrounding habitat.

The vulnerability of an environmental asset was determined by its conservation status and its geographic extent (distribution across the landscape). Vulnerability and potential impact

of bush fire were used to assess the consequence of a bush fire impacting upon an environmental asset.

### **Cultural**

For non-indigenous historical, Aboriginal and other cultural assets a potential fire behaviour model using fuel load, slope and proximity was used to produce a threat rating. The physical vulnerability of the asset to a bush fire was also assessed. These ratings were then used to assess the consequence of a bush fire impacting upon a cultural asset.

### **2.3.3 Assessing the Bush Fire Risk - Likelihood**

For all asset types the likelihood of a bush fire occurring was assessed. This involves considering fire history, including ignition cause and patterns, known fire paths, access, containment potential and potential fire run (size of the vegetated area). See Appendix 2 for the likelihood ratings assigned to each asset identified in the Castlereagh BFMC area.

### **2.3.4 Identifying the level of risk**

The consequence and likelihood ratings were then used to identify the level of risk. See Appendix 2 for the risk ratings assigned to each asset identified in the Castlereagh BFMC area.

### **2.3.5 Evaluating the Bush Fire Risk**

Once the risk ratings for each asset were identified, they were evaluated to:

- a) confirm that risk levels identified in the risk analysis process are appropriate and reflect the relative seriousness of the bush fire risk;
- b) identify which assets require treatments; and
- c) identify treatment priorities.

### **2.3.6 Prioritising Treatments**

No organisation has limitless resources to deal with adverse risk. It is therefore necessary to define priorities. The bush fire risk ratings determined were used to prioritise the risk treatments, i.e. areas of extreme risk were considered first for treatment, then very high, then high then medium then low.

It was also necessary to prioritise within the risk levels i.e. determining which of the high risks was the most serious. This was done on the basis of the consequence and likelihood ratings.

### **2.3.7 Risk Acceptability**

Risks below a certain level were assessed as not requiring treatment within the life of this plan. This is due to a combination of risk priority and capacity to undertake the works. Within the Castlereagh BFMC area the level of acceptability is high. Areas of medium or low risk are likely to be managed by routine procedures and so do not require a specific application of resources.

## Chapter 3. Treating the Risk

### 3.1 Bush Fire Management Zones

Bush Fire Management Zones were identified within the Castlereagh BFMC area and mapped (see maps 2 - 4). These zones identify the fire management intent for a specific area. See Table 3.1 for descriptions of the zones and their purposes. The four categories of Bush Fire Management Zones are:

- Asset Protection Zone (APZ);
- Strategic Fire Advantage Zone (SFAZ);
- Land Management Zone (LMZ); and
- Fire Exclusion Zone (FEZ).

**Note:** Some Asset Protection Zones (APZ) within the Castlereagh BFMC are not mapped.

Asset Protection Zones are determined in the Bush Fire Environmental Assessment Code (the Code), and applicable widths for the protection of assets (residential buildings, special fire protection buildings and major buildings) as specified within the Code can be applied to protect assets where these Asset Protection Zones have not been specifically identified. For example: Isolated dwellings and major buildings.

Where Strategic Fire Advantage Zones (SFAZ) adjoins assets, for the purposes of the Castlereagh BFMC Risk Plan, an Asset Protection Zone (APZ) can be deemed to apply to the maximum permissible area under the Code.

Where Strategic Fire Advantage Zone (SFAZ) works are prescribed adjoining assets, Asset Protection Zone (APZ) works can be undertaken to complement the Strategic Fire Advantage Zone works.

Zone	Purpose	Suppression Objective(s)	Zone characteristics
<b>Asset Protection Zone</b>	To protect human life, property and highly valued public assets and values.	To enable the safe use of <b>Direct Attack</b> suppression strategies within the zone. To minimise bush fire impacts on undefended assets.	As per RFS document <i>Standards for Asset Protection Zones</i> .
<b>Strategic Fire Advantage Zone</b>	To provide strategic areas of fire protection advantage which will reduce the speed and intensity of bush fires, and reduce the potential for spot fire development; To aid containment of wildfires to existing management boundaries.	To improve the likelihood and safe use of: <b>Parallel Attack</b> suppression strategies within the zone. and/or <b>Indirect Attack</b> (back burning) in high to very high fire weather conditions within the zone.  To reduce the likelihood of: Crown fire development within the zone. and/or Spot fire ignition potential from the zone	Zone width related to suppression objectives and dependant upon: <ul style="list-style-type: none"> <li>• Topography</li> <li>• Aspect</li> <li>• Spotting propensity</li> <li>• Location of adjacent firebreaks</li> <li>• Mosaic pattern of treatment</li> </ul> Assess Overall Fuel Hazard (OFH) once vegetation communities reach minimum fire thresholds within this plan. Management practices should aim to achieve mosaic fuel reduction patterns so that the majority of the SFAZ has an OFH of less than high.
<b>Land Management Zone</b>	To meet relevant land management objectives in areas where APZs or SFAZs are not appropriate.	As per the land management and fire protection objectives of the responsible land management agency. To reduce the likelihood of spread of fires. To undertake mosaic burning	As appropriate to achieve land management e.g. heritage and/or fire protection e.g. broad scale mosaic burning objectives.
<b>Fire Exclusion Zone</b>	To exclude bush fires.	N/A	Variable dependant on size of fire sensitive area requiring protection.

**Table 3.1 Bush Fire Management Zones: Purpose, objectives and characteristics**

NB: OFH refers the Overall Fuel Hazard Guide as described in the document published by (Dept. of Sustainability and Environment 3<sup>rd</sup> edition. 1999 & NPWS version); State-wide procedures for assessment of fuel hazard will be developed in conjunction with the BFCC.

**Note:** All areas that are not mapped or described as APZs or SFAZs are considered as LMZs.

For the purpose of the Bush Fire Environmental Assessment Code:

1. Plantations that are approved under the *Plantations & Reafforestation Act 1999* after closure of the public exhibition period for this BFRMP are considered to be identified in this BFRMP; and
2. Retained vegetation within the aforementioned plantations is considered to be a Strategic Fire Advantage Zone identified in the text of this BFRMP as long as it meets the suppression objectives for SFAZs included in the BFRMP, and is not mapped or otherwise described as a Fire Exclusion Zone in the BFRMP.

### **3.2 BFMC Wide Treatments**

BFMC wide treatments are activities which reduce the overall bush fire risk within the BFMC area and are undertaken on an ongoing basis as part of normal business. These treatments are not linked to specific assets in the BFRMP, rather they are applied across all or part of the BFMC area as designated by legislation or agency policy. BFMC wide treatments include the following:

- **Reviewing the bush fire prone land map**

These maps identify bush fire prone land and are used to trigger whether a development application is assessed using *Planning for Bush Fire Protection*<sup>1</sup>.
- **Ensuring developments in bush fire prone land comply with *Planning for Bush Fire Protection***

This assessment process requires new applications for development to include bush fire protection measures.
- **Using the Local Environment Plan/s (LEPs) to control developments in areas with a bush fire risk**

LEPs can be used to exclude development in extreme bush fire risk areas or where bush fire protection measures cannot be incorporated.
- **Varying the standard bush fire danger period as required**

In years where the weather is particularly adverse the bush fire danger period may be brought in early or extended. This is assessed every year by the BFMC.
- **Requiring permits during the bush fire danger period**

In the bush fire danger period a fire safety permit is required to light a fire in the open. Permits specify conditions such as fire fighting equipment that must be on site, or restrict burns based on weather conditions.

---

<sup>1</sup> NSW Rural Fire Service 2006 *Planning for Bush Fire Protection: A guide for councils, planners, fire authorities and developers*.

- **Prosecution of arsonists/offenders**

Under the *Rural Fires Act 1997* persons may be prosecuted for breaching the conditions on a fire permit, lighting a fire during a Total Fire Ban, allowing fire to escape their property, or other breaches of the Act.

- **Investigation of bush fire cause**

All bush fires which do not have a known cause are investigated to identify how they started.

- **Normal fire suppression activities**

Responding to bush fire is a normal business activity for the fire fighting authorities.

- **Assessing and managing compliance with strategic fire fighting resource allocation provisions**

Strategic fire fighting resource allocation provisions is the process used to identify the number of stations, brigades and appliances required in an area, and considers members, training, assets and hazards.

- **Preparation of a S52 Operations Coordination Plan**

The Operations Coordination Plan is prepared biannually and sets out how coordinated fire fighting will occur. It includes specific operational restrictions on fire fighting techniques in certain areas, where fires will be managed from, and how agencies involved can communicate during operations.

- **Fire Management Plans or Plans of Management**

Some land management agencies have developed fire management plans or plans of management with specific fire or fuel management strategies, for example a Forests NSW Regional Fuel Management Risk Plan, a NPWS Fire Management Strategy. These publicly exhibited plans form the basis for operational fire planning on public parks, reserves and forests.

- **Bush Fire Hazard Complaints**

If someone is concerned about possible bush fire hazards on a neighbouring property or any other land, then this can be reported to the RFS Commissioner or their local RFS Fire Control Centre. The complaint will be investigated and may result in a notice being issued to the landowner or manager to reduce the hazard.

### 3.3 Asset Specific Treatments

There are five broad strategy groups available to treat the bush fire risk to assets identified in the BFRMP.

The types of asset specific treatments in each strategy group used in the Castlereagh BFMC area are listed below. A full list of the treatment strategies in the Castlereagh BFMC area are in Appendix 3.

<b>Strategy</b>	<b>Targeted treatments used in the Castlereagh BFMC area</b>
Ignition Management	Improve fire permit management. Investigate fire cause and origin. Restrict or manage public access.
Hazard Reduction	Undertake fuel management activities including mechanical, burning, grazing and chemical treatments.
Community Education	To undertake fuel management activities aimed at increasing levels of community resilience and preparedness.
Property Planning	Maintain Fire Trails. Improve access for emergency and fire fighting vehicles. Apply Planning for Bush Fire Protection.
Preparedness	Review emergency fire relocation plans. Undertake routine maintenance of fire trails. Prepare and maintain DECCW RFMS for National Parks & Reserves

**Table 3.2 Asset specific treatments used in the Castlereagh BFMC area**

Vegetation formation	Minimum SFAZ Threshold	Minimum LMZ Threshold	Maximum Threshold	Notes
Rainforest	NA	NA	NA	Fire should be avoided.
Alpine complex	NA	NA	NA	Fire should be avoided.
Wet Sclerophyll forest (shrubby subformation)	25	30	60	Crown fires should be avoided in the lower end of the interval range.
Wet Sclerophyll forest (grassy subformation)	10	15	50	Crown fires should be avoided in the lower end of the interval range.
Grassy woodland	5	8	40	Minimum interval of 10 years should apply in the southern Tablelands area. Occasional intervals greater than 15 years may be desirable.
Grassland	2	3	10	Occasional intervals greater than 7 years should be included in coastal areas. There was insufficient data to give a maximum interval; available evidence indicates maximum intervals should be approximately 10 years.
Dry sclerophyll forest (shrub/grass subformation)	5	8	50	Occasional intervals greater than 25 years may be desirable.
Dry sclerophyll forest (shrub subformation)	7	10	30	Occasional intervals greater than 25 years may be desirable.
Heathlands	7	10	30	Occasional intervals greater than 20 years may be desirable.
Freshwater wetlands	6	10	35	Occasional intervals greater than 30 years may be desirable.
Forested wetlands	7	10	35	Some intervals greater than 20 years may be desirable.
Saline wetlands	NA	NA	NA	Fire should be avoided.
Semi-arid woodlands (grassy subformation)	6	9	No max	Not enough data for a maximum fire interval.
Semi-arid woodlands (shrubby subformation)	10	15	No Max	Not enough data for a maximum fire interval.
Arid shrublands (chenopod subformation)	NA	NA	NA	Fire should be avoided.
Arid shrublands (acacia subformation)	10	15	No Max	Not enough data for a maximum fire interval.

**Table 3.3 Fire Thresholds for Vegetation Categories**

### 3.4 Annual Works Programs

The land management agencies and fire fighting authorities responsible for implementing the treatments identified in this plan will include those treatments in their annual works programs detailing how, when, and where the required activities will be undertaken.

### **3.5 Implementation**

When the treatments identified in this BFRMP are implemented there are a number of issues that need to be considered by the responsible agency including environmental assessments and approvals, smoke management and prescribed burn plans.

#### **Local fire safety permit issuing and hazard reduction burning exclusion periods**

In the Castlereagh BFMC area the issuing of permits and hazard reduction burning is not permitted between the 27<sup>th</sup> December to 31<sup>st</sup> December or on gazetted public holidays during the Bush Fire Danger Period (BFDP).

#### **Notice of intention to maintain a fire**

In the Castlereagh BFMC area any person maintaining a fire in the open except for the purpose of cooking or heating must give at least 24 hours notice of their intention to light a fire to all adjacent landholders and to the local NSW Rural Fire Control Centre or NSW Fire Brigade Station.

## **Chapter 4. Performance Monitoring and Reviewing**

### **4.1 Review**

This BFRMP must be reviewed and updated within each successive five-year period from the constitution of the BFMC. The Castlereagh BFMC will also review this plan as necessary to account for any changes in context or risk. This may be triggered by a range of circumstances, including but not limited to:

- changes to the BFMC area, organisational responsibilities or legislation;
- changes to the bush fire risk in the area; or
- following a major fire event.

### **4.2 Monitoring**

The BFMC is required to monitor progress towards the completion of treatment works listed in the BFRMP, and the timeliness of the works.

### **4.3 Reporting**

The BFMC is required to report annually to the BFCC on its progress in implementing the bush fire risk management activities identified in this plan.

### **4.4 Performance Measurements**

State wide performance measurements which are linked to the BFRMP have been identified by the BFCC. All BFMCs must use these to monitor and report on their success in reducing the bush fire risk in their BFMC area.

## **Appendices**

### **Appendix 1. Castlereagh BFMC Participation Strategy**

#### **1.1 Purpose**

- To ensure that specific and targeted communication occurs between the BFMC and the community throughout the development of Bush Fire Risk Management Plans (BFRMP).
- To ensure prominent stakeholders do not make judgements of the acceptability of a risk based on their own perception of risk.
- To provide greater opportunity for local brigades, land holders and other stakeholders to have input into the bush fire risk management process.
- To determine the concerns of the community regarding bush fire risks within the community.
- To ensure that the community's perceptions of risk, as well as their perceptions of benefits, be identified, understood, documented and addressed in the BFRMP.
- To improve community confidence in bush fire risk management across the landscape and provide the community with a sense of ownership of the BFRMP.
- Educate the community regarding bush fire risk management in the area so that they can contribute towards risk reduction.

## 1.2 Target Audience

Potential organisations and individuals to be targeted are identified in the following table.

Target Audience	Description
Community	People who live or have assets within the Gilgandra and Warrumbungle Shire Councils LGAs, particularly those potentially effected by bush fire
Community groups	Formal and informal networks operating within the community such as: <ul style="list-style-type: none"> <li>- Environmental groups- Landcare, Nature Conservation Council, Local Flora Groups etc</li> <li>- Service clubs</li> <li>- Community action groups</li> <li>- Chamber of commerce and industry</li> <li>- Schools</li> <li>- Local Aboriginal land councils</li> <li>- Farming groups</li> </ul>
Existing BFMC subcommittees	The formal and informal networks operating within the existing bush fire risk management structure
Local government networks	Local government/community. Formal and informal networks based on the local government council
Agency networks	Formal and informal networks within and between emergency service agencies, functional area agencies and the community
RFS Brigades and Community Fireguard groups	Formal volunteer groups with an active interest in fire management.

**Table 1.1 Target audiences**

## 1.3 Issues to be Communicated

There are key considerations that will affect the community and should be actively discussed with all stakeholders. They are:

- Identification of risks- where are the hazards and assets
- Determination the likelihood/consequence
- Prioritisation of risks
- Risk treatment strategies
- Community Engagement (Education)

## 1.4 Methods of Communication

Communicative activity	Target	Description	Main resources required
Community meetings	Coonabarabran Coolah Gilgandra	Initiating community meeting, facilitating open forums, semi structured discussion	presenter/facilitator - briefing PowerPoint presentation - meeting venue - electronic & paper maps
Because of the size of the villages and towns most interest groups will be involved in the public meetings held over the Zone			
Pre-planned meetings  Rural Fire Service Brigade Captains & group Captains	<ul style="list-style-type: none"> <li>- Farmer Assoc.</li> <li>- NCC</li> <li>- Neighbourhood watch</li> <li>- Rural Fire Volunteers</li> </ul>	Providing speakers to present at pre-organised conferences/meetings	<ul style="list-style-type: none"> <li>- presenter</li> <li>- briefing</li> <li>PowerPoint presentation (template provided by HO)</li> <li>- maps</li> </ul>
Media — Coonabarabran Times Gilgandra Weekly Community Newsletters <ul style="list-style-type: none"> <li>- Coolah</li> <li>- Mendooran</li> <li>- Dunedoo</li> </ul> ABC Local Radio Community Radio <ul style="list-style-type: none"> <li>- WAR FM</li> <li>- WCR FM</li> </ul> Three Rivers FM	<ul style="list-style-type: none"> <li>- Warrumbungle and Gilgandra Shire Council residents</li> </ul>	Local press and radio relay announcements, distributing information and promoting community meetings etc	<ul style="list-style-type: none"> <li>- text for articles (template provided by HO)</li> </ul>
Internet— Gilgandra and Warrumbungle Councils	Residents of Castlereagh Zone	Utilizing Council websites to inform and promote e.g. FAQs on the Local Council website	<ul style="list-style-type: none"> <li>- text</li> <li>- internet access</li> </ul>
Information phone line <ul style="list-style-type: none"> <li>• DECCW</li> <li>• RFS</li> <li>• FNSW</li> </ul>	All residents	A contact number for public inquiries and comments. Allows for participation from community members that did not attend community meetings etc	<ul style="list-style-type: none"> <li>- BFMC representative to take calls, provide information and maintain an issues database.</li> </ul>

<b>Communicative activity</b>	<b>Target</b>	<b>Description</b>	<b>Main resources required</b>
Information email address  RFS	<a href="mailto:Castlereagh.Zone@rfs.nsw.gov.au">Castlereagh.Zone@rfs.nsw.gov.au</a>	An email address for public inquiries and comments. Allows for participation from community members that did not attend community meetings etc	- BFMC representative to respond to emails and maintain an issues database (see 2.5)
Information Flyer	All residents in bushfire prone areas	Pamphlet to promote and inform the community of the BFRMP	Funds for printing and distributing.

**Table 1.2 Communication method**

## 1.5 Implementation

Date	Target Group	Method of communication	Consultation method	Key messages/ purpose	Resources required	Responsibility
Ongoing	General public	Contact number/ information line Email	Number advertised on notice boards, and in local news papers	- maintain community participation - record and consider issues and comments - provide feedback	- Media Information - Contact personal - Landline number	- Garry Wilson RFS - Peter Brookhouse DECCW - Steve O'Callaghan RFS -Jodie Storer RFS
13 Apr	RFS volunteers Coonabarabran	Presentation at Group/Captains meeting Coonabarabran	RFS correspondence,	-identify the assets - identify major areas of risk - discuss likelihood/ consequence - discuss treatment options	- venue - facilitator/s - PowerPoint presentation - paper & electronic maps	- Steve O'Callaghan RFS - Garry Wilson RFS - Peter Brookhouse DECCW - Peter Shinton Warrumbungle Council - Gary Miller FNSW
14 Apr	RFS volunteers Gilgandra	Presentation at Group/Captains meeting Gilgandra	RFS correspondence,	-identify the assets - identify major areas of risk - discuss likelihood/ consequence - discuss treatment options	- venue - facilitator/s - PowerPoint presentation - paper & electronic maps	- Steve O'Callaghan RFS - Garry Wilson RFS - Peter Brookhouse DECCW

Date	Target Group	Method of communication	Consultation method	Key messages/ purpose	Resources required	Responsibility
15 Apr	RFS volunteers Coolah	Presentation at Group/Captains meeting Coolah	RFS correspondence,	-identify the assets - identify major areas of risk - discuss likelihood/ consequence - discuss treatment options	- venue - facilitator/s - PowerPoint presentation - paper & electronic maps	- Steve O'Callaghan RFS - Garry Wilson RFS - Peter Brookhouse DEC - Gary Miller FNSW - Peter Shinton Warrumbungle Council
23 Mar	General public	Community meeting Coonabarabran	Advertisement articles in local newspaper & Community Radio	- What are BFRMPs -community values - identify the assets - discuss likelihood/ consequence - discuss treatments -preparedness education	- media article - venue (Coonabarabran FCC) - facilitator/s - PowerPoint presentation - paper & electronic maps	- Steve O'Callaghan RFS - Garry Wilson RFS - Peter Brookhouse DECCW - Peter Shinton Warrumbungle Council - Zone Com NSWFB - Gary Miller FNSW
24 Mar	General public	Community meeting Coolah	Advertisement articles in local newspaper & Community Radio	- What are BFRMPs -community values - identify the assets - discuss likelihood/ consequence - discuss treatments -preparedness education	- Media article - venue (Coolah Sports Club) - facilitator/s - PowerPoint presentation	- Steve O'Callaghan RFS - Garry Wilson RFS - Peter Brookhouse DECCW - Peter Shinton Warrumbungle Council - Dave Felton NSWFB

Date	Target Group	Method of communication	Consultation method	Key messages/ purpose	Resources required	Responsibility
25 Mar	General public	Community meeting Gilgandra	Advertisement articles in local newspaper & Community Radio	<ul style="list-style-type: none"> <li>- What are BFRMPs</li> <li>-community values</li> <li>- identify the assets</li> <li>- discuss likelihood/ consequence</li> <li>- discuss treatments</li> <li>-preparedness education</li> </ul>	<ul style="list-style-type: none"> <li>- media article</li> <li>- venue (Shire Hall Training Room)</li> <li>- facilitator/s</li> <li>- PowerPoint presentation</li> <li>- paper &amp; electronic maps</li> </ul>	<ul style="list-style-type: none"> <li>- Steve O'Callaghan RFS</li> <li>- Garry Wilson RFS</li> <li>- Peter Brookhouse DECCW</li> <li>- Gary FNSW</li> <li>- Dave Felton NSWFB</li> <li>- Gilgandra Council</li> </ul>

**Table 1.3 Implementation schedule**

**Note:** Because of the size of the villages and towns in the zone most special interest groups will be involved with the Public or Group/Captains Meetings

# Castlereagh BFMC Bush Fire Risk Management Plan 2012

Warrumbungle North - Map Display Area

Map 1 of 3

DRAFT

This Bush Fire Risk Management Plan (BFRMP) has been prepared by the Castlereagh Bush Fire Management Committee (BFMC) pursuant to section 52 of the Rural Fires Act 1997.

The aim of this BFRMP is to reduce the adverse impact of bush fires on life, property and the environment.

The objectives of this BFRMP are to:

- reduce the number of human-induced bush fire ignitions that cause damage to life, property or the environment;
- manage fuel to reduce the spread and intensity of bush fires while minimising environmental/ecological impacts;
- reduce the community's vulnerability to bush fires by improving its preparedness; and
- effectively contain fires with a potential to cause damage to life, property and the environment.

This map forms part of the BFRMP for the Castlereagh BFMC, covering the local government areas of Gilgandra and Warrumbungle. It should be viewed in conjunction with the accompanying BFRMP document which provides further details on the BFMC area, the assets assessed and the risk assessment process used.

**Review**  
Under the Rural Fires Act 1997 this plan must be reviewed and updated within each successive five year period following the constitution of the BFMC. The Castlereagh BFMC will also review this plan as necessary. This may be triggered by a range of circumstances, including but not limited to:

- changes to the BFMC area, organisational responsibilities or legislation;
- changes to the bush fire risk in the area; or
- following a major fire event.

**Assets**  
This BFRMP identifies the assets that are considered by the Castlereagh BFMC and community to be at risk from bush fires, assesses the bush fire risk to each asset and assigns treatments designed to mitigate the risk. Assets in the BFMC area identified as requiring treatments are listed in the assets table. Other assets within the BFMC area that were assessed as not requiring treatments within the life of this plan are listed in the appendix to the BFRMP document. The Map Ref number "NA" denotes non-spatial assets.

**Treatments**  
Specific treatments assigned to assets in the Castlereagh area are listed in the treatments table and linked to the assets which they are designed to protect. Standard BFMC wide treatments (i.e. not linked to a specific asset) which occur on an ongoing basis within the BFMC area are:

- reviewing the bush fire prone land map;
- ensuring developments in the bush fire prone land comply with Planning for Bush Fire Protection;
- using the Local Environment Plans (LEPs) to control development in areas with a bush fire risk;
- varying the standard bush fire danger period as required;
- requiring permits during bush fire danger periods
- prosecution of arsonists/offenders
- investigation of bush fire causes;
- normal fire suppression activities;
- assessing and managing compliance with strategic fire-fighting resource allocation management systems;
- preparation of a S22 Operations Coordination Plan;

Note on LMZ: All areas not specifically mapped as an APZ, SFZ or FEZ are considered as LMZ for this risk management plan. For areas identified by an LMZ polygon on the map, please refer to the BFRMP document for the specific land management objectives.

Zone	Purpose	Suppression	Zone
<b>Asset Protection Zone</b>	To protect human life, property and highly valued public assets within the zone.	To enable the safe use of <b>Direct Attack</b> suppression strategies within the zone. To minimise bush fire impacts on undefended assets.	As per RFS document Standards for Asset Protection Zones.
<b>Strategic Fire Advantage Zone</b>	To provide strategic areas of fire protection advantage which will reduce the speed and intensity of bush fires, and reduce the potential for spot fire development. To aid containment of wildfires to existing management boundaries.	To improve the likelihood and safe use of <b>Parallel Attack</b> suppression strategies within the zone. To reduce the likelihood of Crown fire development within the zone, and/or Spot fire ignition potential from the zone. Management practices should aim to achieve mosaic fuel reduction patterns so that the majority of the SFZ has an OFI of less than high.	Zone width related to suppression objectives and dependent upon: - Topography - Aspect - Spotting propensity - Location of adjacent fire breaks - Mosaic pattern of treatment Assess Overall Fuel Hazard (OFH) once vegetation communities reach minimum fire thresholds within this plan. Management agencies should aim to achieve mosaic fuel reduction patterns so that the majority of the SFZ has an OFI of less than high.
<b>Land Management Zone</b>	To meet relevant land management and fire protection objectives in area where APZs or SFZs are not appropriate.	To reduce the likelihood of spread of fires. To undertake mosaic burning.	As per the land management and fire protection objectives of the responsible land management agency. To reduce the likelihood of spread of fires. To undertake mosaic burning.
<b>Fire Exclusion Zone</b>	To exclude bush fires.	N/A	Variable dependant on size of fire sensitive area requiring protection.

# Castlereagh BFMC Bush Fire Risk Management Plan 2012

Warrumbungle South - Map Display Area

Map 2 of 3

DRAFT

This Bush Fire Risk Management Plan (BFRMP) has been prepared by the Castlereagh Bush Fire Management Committee (BFMC) pursuant to section 52 of the Rural Fires Act 1997.

The aim of this BFRMP is to reduce the adverse impact of bush fires on life, property and the environment.

The objectives of this BFRMP are to:

- reduce the number of human-induced bush fire ignitions that cause damage to life, property or the environment;
- manage fuel to reduce the spread and intensity of bush fires while minimising environmental/ecological impacts;
- reduce the community's vulnerability to bush fires by improving its preparedness; and
- effectively contain fires with a potential to cause damage to life, property and the environment.

This map forms part of the BFRMP for the Castlereagh BFMC, covering the local government areas of Gilgandra and Warrumbungle. It should be viewed in conjunction with the accompanying BFRMP document which provides further details on the BFMC area, the assets assessed and the risk assessment process used.

**Review**  
Under the Rural Fires Act 1997 this plan must be reviewed and updated within each successive five year period following the constitution of the BFMC. The Castlereagh BFMC will also review this plan as necessary. This may be triggered by a range of circumstances, including but not limited to:

- changes to the BFMC area, organisational responsibilities or legislation;
- changes to the bush fire risk in the area; or
- following a major fire event.

**Assets**  
This BFRMP identifies the assets that are considered by the Castlereagh BFMC and community to be at risk from bush fire, assesses the bush fire risk to each asset and assigns treatments designed to mitigate the risk. Assets in the BFMC area identified as requiring treatments are listed in the assets table. Other assets within the BFMC area that were assessed as not requiring treatments within the life of this plan are listed in the appendix to the BFRMP document. The Map Ref number "NA" denotes non-spatial assets.

**Treatments**  
Specific treatments assigned to assets in the Castlereagh area are listed in the treatments table and linked to the assets which they are designed to protect. Standard BFMC wide treatments (i.e. not linked to a specific asset) which occur on an ongoing basis within the BFMC area are:

- reviewing the bush fire prone land map;
- ensuring developments in the bush fire prone land comply with Planning for Bush Fire Protection;
- using the Local Environment Plan's (LEPs) to control development in areas with a bush fire risk;
- varying the standard bush fire danger period as required;
- requiring permits during bush fire danger periods
- prosecution of arsonists/offenders
- investigation of bush fire causes;
- normal fire suppression activities;
- assessing and managing compliance with strategic fire-fighting resource allocation management systems;
- preparation of a S&S Operations Coordination Plan;

Note on LMZ: All areas not specifically mapped as an APZ, SFAZ or FEZ are considered as LMZ for this risk management plan. For areas identified by an LMZ polygon on the map, please refer to the BFRMP document for the specific land management objectives.

Zone	Purpose	Suppression	Zone
<b>Asset Protection Zone</b>	To protect human life, property and highly valued public assets and values.	To enable the safe use of <b>Direct Attack</b> suppression strategies within the zone. To minimise bush fire impacts on undefended assets.	As per RFS document Standards for Asset Protection Zones.
<b>Strategic Fire Advantage Zone</b>	To provide strategic areas of fire protection advantage which will reduce the speed and intensity of bush fire, and reduce the potential for spot fire development. To aid containment of wildfires to existing management boundaries.	To improve the likelihood and safe use of <b>Parallel Attack</b> suppression strategies within the zone. <b>Indirect Attack</b> (back burning) in high to very high fire weather conditions within the zone. To reduce the likelihood of: Crown fire development within the zone, and/or Spot fire ignition potential from the zone.	Zone width related to suppression objectives and dependent upon: - Topography - Aspect - Location of adjacent fire breaks - Mosaic pattern of treatment Assess Overall Fuel Hazard (OFH) once vegetation communities reach minimum fire thresholds within this plan. Management practices should aim to achieve mosaic fuel reduction patterns so that the majority of the SFAZ has an OFH of less than high.
<b>Land Management Zone</b>	To meet relevant land management objectives in area where APZs or SFAZs are not appropriate.	As per the land management and fire protection objectives of the responsible land management agency. To reduce the likelihood of spread of fires. To undertake mosaic burning.	As appropriate to achieve land management, e.g. heritage and/or fire protection e.g. broad scale mosaic burning objectives.
<b>Fire Exclusion Zone</b>	To exclude bush fires.	N/A	Variable dependant on size of fire sensitive area requiring protection.

**Review**  
Under the Rural Fires Act 1997 this plan must be reviewed and updated within each successive five year period following the constitution of the BFMC. The Castlereagh BFMC will also review this plan as necessary. This may be triggered by a range of circumstances, including but not limited to:

- changes to the BFMC area, organisational responsibilities or legislation;
- changes to the bush fire risk in the area; or
- following a major fire event.

**Assets**  
This BFRMP identifies the assets that are considered by the Castlereagh BFMC and community to be at risk from bush fires, assesses the bush fire risk to each asset and assigns treatments designed to mitigate the risk. Assets in the BFMC area identified as requiring treatments are listed in the assets table. Other assets within the BFMC area that were assessed as not requiring treatments within the life of this plan are listed in the appendix to the BFRMP document. The Map Ref number "NA" denotes non-spatial assets.

**Treatments**  
Specific treatments assigned to assets in the Castlereagh area are listed in the treatments table and linked to the assets which they are designed to protect. Standard BFMC wide treatments (i.e. not linked to a specific asset) which occur on an ongoing basis within the BFMC area are:

- reviewing the bush fire prone land map;
- ensuring developments in the bush fire prone land comply with Planning for Bush Fire Protection;
- using the Local Environment Plan's (LEPs) to control development in areas with a bush fire risk;
- varying the standard bush fire danger period as required;
- requiring permits during bush fire danger periods;
- prosecution of arsonists/offenders;
- investigation of bush fire causes;
- normal fire suppression activities;
- assessing and managing compliance with strategic fire-fighting resource allocation management systems;
- preparation of a S2 Operations Coordination Plan;

Note on LMZ: All areas not specifically mapped as an APZ, SFZ or FEZ are considered as LMZ for this risk management plan. For areas identified by an LMZ polygon on the map, please refer to the BFRMP document for the specific land management objectives.

Zone	Purpose	Suppression	Zone
<b>Asset Protection Zone</b>	To protect human life, property and highly valued public assets and values.	To enable the safe use of <b>Direct Attack</b> suppression strategies within the zone. To minimise bush fire impacts on undefended assets.	As per RFS document Standards for Asset Protection Zones.
<b>Strategic Fire Advantage Zone</b>	To provide strategic areas of fire protection advantage which will reduce the speed and intensity of bush fires, and reduce the potential for spot fire development. To aid containment of wildfires to existing management boundaries.	To improve the likelihood and safe use of <b>Parallel Attack</b> suppression strategies within the zone. <b>Indirect Attack</b> (back burning) in high to very high fire weather conditions within the zone. To reduce the likelihood of: Crown fire development within the zone; and/or Spot fire ignition potential from the zone.	Zone width related to suppression objectives and dependent upon: - Topography - Aspect - Spotting propensity - Location of adjacent fire breaks - Mosaic pattern of treatment Assess Overall Fuel Hazard (OFH) once vegetation communities reach minimum fire thresholds within this plan. Management practices should aim to achieve mosaic fuel reduction patterns so that the majority of the SFZ has an OFH of less than high.
<b>Land Management Zone</b>	To meet relevant land management objectives in area where APZs or FEZs are not appropriate.	As per the land management and fire protection objectives of the responsible land management agency. To reduce the likelihood of spread of fires. To undertake mosaic burning.	As appropriate to achieve land management, e.g. heritage and/or fire protection e.g. broad scale mosaic burning objectives.
<b>Fire Exclusion Zone</b>	To exclude bush fires.	N/A	Variable dependant on size of fire sensitive area requiring protection.

 Produced by: socallaghan

**WARNING INFORMATION**

1. This map has been prepared by a NSW Government Agency ("the Agency") using data supplied to it by other agencies and entities.
2. The Agency has not verified or checked the data used to prepare this map. The map may contain errors and omissions. The Agency has not made any attempt to ground truth the map.
3. There will be a margin of error in relation to the location of features recorded on the map. The Agency is unable to specify the extent or magnitude of that margin of error.
4. Significant changes may have occurred:
  - i. in the time between which the data was originally collected and the map produced; and
  - ii. since the map was produced.
5. Users must, wherever possible, ground truth the map before relying on it or the accuracy of the map or the information recorded on the map for any purpose.
6. The Agency accepts no responsibility for any injury loss or damage arising from the use of this map or any errors or omissions in the information recorded on the map.
